

WinTool Interface for Esprit EDGE

Release 1.4.0 for Esprit EDGE 2026.1 Hotfix 1 (2026.1.2615.3887)

History

1.4.0

New features, improvements & changes

- Compatible with WinTool 2026.1
- Compatible with Esprit EDGE 2026.1 Hotfix 1 (2026.1.2615.3887)
- Fixed issue not exporting tool assemblies to WinTool if “#” is contained in the Tool ID field
- Fixed issue not exporting tool assemblies to WinTool if project contains no tool connected cycles (milling and turning)
 - Custom cycles (espTechMillCustom and etc.)
 - Steady rest
- Fixed issue showing “ERROR” as Tool ID when importing tool assemblies containing a apostrophe or quote character in the description

Known issues

- Holders (Adaptive Item) file reference disappear after opening properties. As a workaround the file can be set manually. After setting it manually it does not disappear anymore.
- Wrong orientation of inserts in Turning tools with a neutral tool holder (/ET173)

1.3.1

New features, improvements & changes

- Fixed issue in WT-ToolExport with not closing dialog after entering valid tool assembly number and pressing enter or clicking on the button

Known issues

- Holders (Adaptive Item) file reference disappear after opening properties. As a workaround the file can be set manually. After setting it manually it does not disappear anymore.
- Wrong orientation of inserts in Turning tools with a neutral tool holder (/ET173)

1.3.0

New features, improvements & changes

- Compatible with WinTool 2025.4
- Compatible with Esprit EDGE 2025.3 (2025.3.2533.3219)
- Added how-to for KBM configuration in the Docs folder
- Fixed issue with broken grid layouts in WT-ToolExport

Known issues

- Holders (Adaptive Item) file reference disappear after opening properties. As a workaround the file can be set manually. After setting it manually it does not disappear anymore.
- Wrong orientation of inserts in Turning tools with a neutral tool holder (/ET173)

1.2.0

New features, improvements & changes

- Compatible with WinTool 2025.1
- Compatible with Esprit EDGE 2025.1 (2025.1.2508.2605)
- Fixed issue importing Tool List with empty Revolver or Station

Known issues

- Holders (Adaptive Item) file reference disappear after opening properties. As a workaround the file can be set manually. After setting it manually it does not disappear anymore.
- Wrong orientation of inserts in Turning tools with a neutral tool holder (/ET173)
